Subject: Kiewit vs Cactus

As a follow up to my previous e-mail--

Please separate the projects and prioritize the Kiewit Project (not related to \$1350 Au???) both from a mine plan and EA perspective--

The EA's will now necessarily need to be split.

As time allows, we want to finish the Cactus--- but the technical aspects of the Cactus-- to complete the mine plan review-- have proven overwhelming in the short term and are now dragging down the main project-- the Kiewit.

Thank you.
